10 Reading:

Learning English is not easy at all. However, if you continue *it*, you will be able to communicate in English after about one year or so. The most difficult part of learning this language is the pronunciation of the words because many of the words are not spoken in the same they are written. For example, the 'b' in the word "dumb" , the "k" in the word "knight" and the final "e" in the word "before" are not pronounced. Furthermore, some sounds do not exist in the English alphabet, but they are pronounced in certain words that have a combination of certain sounds. A good example of this combination is "sh" in the words "childish", "peevish" and "English".

Although English pronunciation is irregular, hard and confusing, English learners who have practiced a lot can easily distinguish and utter them. The guide to correct pronunciation is available in the entry of every word in the dictionary. Every dictionary also *contains* an introduction to English pronunciation from which you can distinguish different sounds. An easier way to learn native pronunciation of English words is to listen to audio books and watch English movies.
