	student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary .When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words <u>They</u> are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jumped into the next lesson .When students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out. QUESTIONS: 37. What kind of dictionaries should a student have? 38. What does the underlined word "they" refer to? a) problems b) words c) dictionaries d) students 39. A dictionary is a basic thing for any language class. a. true b. false	
B	READING2. Read the passage and answer the questions. Sleep is important for all people. Did you know that sleep is more important than food? A person, who does not sleep, dies at a younger age than one who does not eat. Let's say if you sleep 12 hours later than you usually do, it will take your body about three weeks to return to normal. We spend about one third of our life in sleep. That's about 121 days a year! How much sleep do we require? We are all different. A baby needs 16 hours of sleep every day .Children to 12 years old need an average of 12 hours of sleep. A teenager needs 9 to 10 hours, and an adult needs an average of 7 to 8 hours of sleep a night. Of course, some people need only 3 hours of sleep each night. Others need 10 hours of sleep. After age 50, the average sleep time goes down to 6.5 hours a night. We need less sleep as we get older. QUESTIONS: 40. How much do we sleep in our lives? 41 .Old people need ……. Hours of sleep each night a) 9 to 10 b) 10 to 12 c) 6.5 d) 16 42. A person who does not sleep,…… than one who does not eat a) lives longer b) lives less c) eats more d) gets older 43. Food is less important than sleep. a) true b)false 44. There is no difference in sleep time among people. a) true b) false	3
C	READING 3 Read the passage and answer the questions as required. Everyone knows that when a child is born, he can not speak. Making a few kinds of sound like crying is the only way he can communicate with others. By crying, he means he is hungry, or he is tired. In this way he can show his feelings, but after a few months, the baby gets aware of his world. At this time, he's careful about everything around him, especially his parents. He begins to record what they do, what they say, and how they act. He even records his parents' accent, tone of voice, or gesture. Then the baby starts to <u>act</u> like them , that is he tries to copy them. By acting like his parents he'll be able to say his first words which are very simple. As he grows up, the child's speaking ability improves, and when he gets older, he can choose proper words, and expressions to say exactly what he wants.	3
