3	**متن زیر را بخوانید و به پرسش های داده شده هر بخش پاسخ دهید.** A dictionary is a book which explains the meanings of words and expressions ranging from letters A-Z. You can find words easily because dictionaries put them in alphabetical order. For instance, a word starting with 'w' follows a word starting with 'v' in a dictionary. The word 'dictionary' comes from the Latin 'dictio' ('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used, dictionaries which translate words from one language to another, dictionaries of biography which tell about famous people, and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. There are also dictionaries which translate words into other languages. Very often one volume of bilingual dictionary translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. A word like 'right' has several meanings in English, for example, 'correct' and 'the opposite of left'. A word like 'present' may be used as an adjective, meaning 'not absent', as a noun, meaning 'gift' or as a verb, meaning 'give'. Words with different meanings exist in other languages, too. A good dictionary lists all the meanings of words to help people find the meaning that they look for. A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like 'pajamas', 'bazaar' and 'paradise' entered English from Persian. . **Write 'T' if the statement is True, 'F' if it is False according to the passage.** (.....) 37. A word starting with 'Q' comes after a word starting with 'R' in a dictionary. (.....) 38. The words 'pajamas' and 'paradise" are not English, originally. **Answer the following questions.** 39. It is very important for us to respect our teachers. We should note that teachers were not always teachers. They were once students like us. They have experienced school time like us. We know that teachers want to help students learn. They have a lot to share with us: their life experiences, their failures, their successes and many more.

When we respect others, we are actually respecting ourselves. We can show our respect to our teachers by paying attention during lessons and following classroom rules. Remember that a good student is always prepared for class.

We all have met many dedicated teachers that go far beyond their duties and become a model for the students. When we listen to them and respect them, they feel honored. When we study well, we are actually appreciating them for their love and attempt.

A dictionary is a collection of words with certain information attached to each word. Dictionaries are organized alphabetically by the so-called headword or stem of the word. The headword is used widely to determine the size of a dictionary. As many languages allow combining words or adding a prefix to create new words, using the stem of a word gives a fairly good estimate of the comprehensiveness of a dictionary. It is believed that a monolingual Dutch dictionary is the largest monolingual dictionary at hand. It took 134 years to finish, starting in 1864, and finishing only in 1998. Initially it was published in 40 volumes.

Which dictionary is the world's largest bilingual one? The Ethnologue estimates that there are 6909 known living languages. Based on this estimate, there are millions of possible bilingual dictionary combinations. Therefore, there is no one answer. The Muret- Sanders dictionary of English- German includes over 400000 words and expressions. The Chinese-Japanese dictionary Dai KanWajiten includes more than 50000 Chinese characters and 500000 compound words. Multilingual dictionaries offer translations to a word into several languages at once. A dictionary by Gregg Cox lists over 5 million entries in 225 languages. The Logos online dictionary features over 8 million words in over 250 languages.
