N	**متن زیر را بخوانید و به سؤالات داده‌شده در هر قسمت پاسخ دهید.** A dictionary is a reference book about words and the function of words. It does so by listing these words in alphabetical order in the form of headwords, the words listed as entries in the dictionary. One distinction that can be made is that between dictionaries that deal with one single language and those that deal with several languages. Firstly, a dictionary that deals only with one language is called a *monolingual dictionary*. These dictionaries have English headwords, English definitions, and all examples and additional information are given in English. Secondly, a dictionary that deals with two languages is called a *bilingual dictionary*. Such dictionaries present headwords in one language, while meanings are given in another language. Example sentences are often given in both languages. Thirdly, a dictionary that deals with more than two languages is called a multilingual dictionary. All these types of dictionaries can be divided into general or specialized dictionaries. The general dictionaries, as the name implies, deal with the more general side of one or several languages. A specialized dictionary, on the other hand, focuses on a more narrow and specialized part of a language, for example the words used in engineering, medicine, aviation, experimental psychology, etc. **True / False** 44. Entries are offered in alphabetical order in dictionaries. a. True b. False 45. In bilingual dictionaries, examples are always given in two languages. a. True b. False **Choose the best answer.** 46. According to the above text, which one is not in monolingual dictionaries? a. English entries b. English definitions c. Example sentences d. Additional information in the second language 47. O	**متن زیر را بخوانید و به سؤالات داده‌شده در هر قسمت پاسخ دهید.** If a person uses two languages in everyday life, he or she is said to be bilingual. Only a few people whom we would call bilingual can speak, read, or write both languages equally well. We call those who can do this "balanced bilinguals". But most bilinguals have a preferred language, which they use most of the time, and then a second language. The level and use of which will vary considerably from one person to another. Children raised bilingually from a very early age are more likely to have an equal skill of both. There are bilingual societies in many parts of the world. Members of these communities use two (or more) languages at the same time. (This does not mean that everyone living in these countries is bilingual.) Bilingualism also occurs in other areas of the world where immigrant groups have lived. They keep up many of their own customs, so they continue to speak their own language at home. In many cases, the bilinguals are not themselves immigrants, but people whose parents, or even grandparents, moved to the country in question and have continued to speak to their children in their own mother tongue. **True / False** 50. There are only a few bilingual societies in the world. a. True b. False 51. Balanced bilinguals can speak, read, or write both languages equally well. a. True b. False **Choose the best answer.** 52. According to the reading, children who were bilingual from a very early age ..... ? a) are more likely to be skillful in one language b) have an equal skill in both cultures c) can write both languages equally correct d) most probably know both languages equally 53.
