The size and shape of your ears show your character more than any other part of the face . Other parts of face change shapes as we get older, but ears do not change their shapes . They only change in size .

Reading people's character from their ears is a very old science . In the past people thought that a person's ears with color were dangerous . They also thought that the shape of the ears showed if a person was musical or not . Today , too many people believe that size and shape of the ears help you know if a person is musical . Ears are all different , and each different thing has a meaning .

Next time you look at a person , see if his or her ears are large , medium-size , or small . Look at the lobes . Ears that are always red mean that a person may get angry easily . Ears that are always cold and nearly white color mean that a person has a nervous character .

*** lobes : نرمه گوش**
