Looking up words you don't know can be difficult, especially if you don't know which definition to choose when you open a dictionary. When to look up a word, how an English dictionary is compiled, and which description to choose will help you effectively use the dictionary to improve your understanding of the reading texts. First, decide when to use the dictionary. Guess the meaning of the word based on the context before looking it up. Read the whole sentence, and continue to read the paragraph to see if you can guess the meaning of the word based on the information coming after or before *it*. Sleep is essential for all people. Did you know that sleep is more important than food? A person, who does not sleep, dies at a younger age than one who does not eat. Let's say if you sleep ١٢ hours later than you usually do,it will take your body about three weeks to return to normal. We spend about one-third (١/٣) of our lives in sleep. That's about ١٢١ days a year!

How much sleep do we require? We are all different. A baby needs ١٦ hours of sleep every day. Children ٦ to ١٢ years old need an average of ١٠ to ١٢ hours of sleep. A teenager needs ٩ to ١٠ hours, and an adult needs an average of ٧ to ٨ hours of sleep a night. Of course, some people need only ٣ hours of sleep each night. Others need ١٠ hours of sleep. After age ٥٠, the average sleep time goes down to ٦,٥ hours a night. We need less sleep as we get older.

Choose the best answer:

٥١. Food is less important than sleep. **a. True** **b. False**

٥٢. There is no difference in sleep time among people. **a. True** **b. False**
