I; Reading Comprehension

All countries that send objects into space find themselves face to face with a serious problem' . Space junk. the 'junk' includes parts of pockets, unwanted remaining parts from launches,and dead satellites.There may well kbe half a million pieces of dangerous waste in orbit. As a you might expect, countries around the world are worried. Many are working on solutions to destroy the detitus.

Japan's space agency has built an electromagnetic tether. This giant steel and aluminum net, nearly half a mile wide, would orbit in space and attract metallic pieces as it travels. once full of waste, the net would fall back into the Earth's atmosphere. The gathered pieces would burn upon re-entry. If this net idea works, japan plans to build a much larger one.

A Swiss company proposes a different answer. It is a devekoping spacecraft that would act as a huge device to collect harmful debries. Like the japanese net, the Swiss device would fall back into Eath's atmosphere, destroying its contents in the process.

٣٧.What is the subject of this passage?

a. A new type of waste b. Useless solutions to a difficulty

c. Difficulty for future space missions d. Ways to send objects into space

٣٨.Which of the following has been described in the passage?

a. launches(paragraph ١) b. orbit(paragraph٢)

c. electromagnetic tether(paragraph٢) d. re- entry(paragraph ٢)

٣٩. The device made by Japan's space agenccy and that made by a Swiss company are similar in all of the following features EXCEPT that they are.....

a. collect waste in space b. look very much alike

c. serve the same purpose d. are designed to make waste burn on their return to Earth

٤٠. What does the word "one' in paragraph ٢ refer to?

a. net b. idea c. piece d. re-entry

موفق باشید .
