.B: Reading passage

.Reading one. Read the following text and then choose the best choice

**Culture shock is a term used to describe the process a person experiences when living outside his or her culture for a long period of time. Culture shock is a reality To many international students. When moving to a new culture, international students must deal with a language that many be unfamiliar, incomperhensible customs and values, and cultural expectations the students may not be fuiil aware of. As a result, the students may go through emotional estremes ranging from excitement with the bew culture to depression. I, like most foreign students, had to fact the harsh reality of culture shock as I pursued my college career. But it wasn't an easy process. There's no magic pill or vaccine. To be successful, international students become familiar with the .process of culture shock, a process that became my way of feeling at ease with French culture**

**.۳۷ According to the passage, culture shock is experienced**

**a.by almost all international students**

**b. by students not familiar with their own culture**

**c. specially when foreign students do not know the language of the foreign country d.because students who start college are not old enough to take care of themselves alone**

**?Which of the following statements is TRUE about the author of this passage .۳۸**

**a. He did not have the problem of culture shock**

**b.It took him a long time to adapt himself to his native culture. c. He spent at least part of his education far from his .homeland. d.He went to France in order to find a job to pay his educatoin fees**

| | .Reading two. Read the passage and then avswer the questions<br><br>Even when asleep, the body needs energy. The more active a person is, the more energy the body uses. The energy comes from the chemical "burning" of carbohydrates, fats, proteins, and certain other substances such as .alcohol<br>The energy values of different foods can be measured by burning them in a special small called a calorimeter. Energy in food is often measured in calories. One kilocalorie, usually written as kcal or calorie (with a capital C), is the amount of energy required to raise the temperature of one kilocalorie of water by ۱° Celsius. In fact, the Calorie is a unit of heat, not energy. In the modern system of measurements, energy is measured in joules. You can find the calorie content of almost any food by looking in a slimming (.kilojoules ٤,۲ Calorie equals) .magazine or book<br>An adult needs, on average, a little under ۳۰۰۰ Calories a day. A manual worker or more, because of the energy used up in physical activity. Children, who are growing and also very active, need extra Calories as well. As people become older they need fewer Calories, partly they are physically less active and partly because some of their body tissues become chemically less active<br><br>?What does one kilocalorie mean .۱<br>?How can the energy values of foods be measured .٤۲<br>.Calorie is actually a unit of energy .٤۳<br>Old people need fewer Calories than manual workers.۴ | ۲ |
