Reading

سوالات هر بخش را با توجه به متن مربوطه پاسخ دهید.

A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put ***them*** in alphabetical order. The word "dictionary" comes from the Latin "dicto"('saying').

There are several types of dictionaries. Dictionaries which explain words and how they are used; this type is simply called monolingual dictionary, dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explains the meanings of technical words.

Dictionaries which explain what words mean give a clear "definition" of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced.

There are also dictionaries which translate words into other languages. We call them bilingual dictionaries. Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English.

When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.
