She believes that helping these people ……**43**…… blood pressure and has a large effect on our health.	15
4	متن زیر را بخوانید سپس به سوالات پاسخ دهید. The best way to learn how to use your particular dictionary effectively is to read its introduction section where you'll find out how the entries are arranged. The introduction section of your dictionary will explain important information such as the abbreviations and pronunciation symbols used throughout the entries. Introductions to dictionaries explain things like how entries are arranged (they typically give the word, and the variations of the word; what part of speech the word is; pronunciation of the word; definition, etc.) Reading the introduction will give you a handle on how to find words and how to use information that you do find. There may also be information on the pronunciation of words with different spellings; this can be helpful if you have only heard a word and you're not sure of its spelling. For example, if you hear "not", it might also be 'knot' but the 'k' is silent, and this list can help you with suggestions.	16
