۵	متن زیر را با دقت بخوانید و به سوالات پاسخ دهید. **Energy is the ability to do work and exists in different forms such as mechanical, electrical, chemical, and nuclear energy. Most of the world's energy comes from fossil fuels like oil, coal, and natural gas. However, fossil fuels are nonrenewable and harmful to the environment because they pollute air and water. In recent years, scientists have focused on clean and renewable energy resources such as wind, water, sunshine, tides, and plants. These resources do not pollute the earth and can be replaced naturally. Using renewable energy reduces the need for fossil fuels. Solar energy is the most common type of clean energy. It has been used for thousands of years and is produced by the radiation that reaches the earth. Today, solar energy can be converted into heat and electricity. It is used for heating buildings and water, and for generating electricity in homes, highway signs, and even space stations. Clean energy helps protect the environment and saves fossil fuels for future generations.** ***True or False** **43.Fossil fuels are renewable sources of energy.** **a. True b. False** **44. False** جملات ناقص زیر را کامل کنید. **45.According to the text, tides and plants are two renewable energy..... .** **46.What is the best antonym for the word "reduce" in line "12" ? .....** **47.The most common type of clean energy is ..... .** **48. Solar power can be converted into electricity and ..... .** به سوالات زیر پاسخ کامل دهید. **49.What helps to save fossil fuels for future generations?.....** **50.Why are fossil fuels nonrenewable?.....**	۱۳
۵	متن زیر را با دقت بخوانید و به سوالات پاسخ دهید. **A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. There are many types of dictionaries. Some are elementary, some are intermediate, and others are advanced. Each type is made for a different level of students. An elementary dictionary usually contains simple words and short explanations. An advanced dictionary, on the other hand, offers long and detailed entries with examples. If you don't have enough money to buy a paper dictionary you can use a free online dictionary, or install some free apps for your smart phones,** **Sometimes, you see abbreviations in a dictionary. Different types of abbreviations are often used in the definitions for a word. If you want to improve your English, teachers usually recommend you to use a good dictionary. It can provide you with meaning, pronunciation, and examples. So, whether you are an elementary or advanced learner, always use a dictionary that fits your level. Do not forget that learning the meaning of a single word is not usually enough. Through sentence examples, try to learn 'words in combination' to expand your vocabulary.** ادامه سؤالات در صفحه بعد	۱۴

۲	**با توجه به متن زیر، پاسخ شماره های ۶۳ تا ۶۶ را داخل جدول و در ردیف مربوطه بنویسید .** **Water is the most essential element in our life. We cannot think of life without water. We need water to drink, to wash our bodies and clothes, to cook our food and to grow crops, vegetables and fruits. Water is also essential for animals, birds, insects, etc. We need huge resources of water to generate electricity on a large and commercial scale. Nearly 70 percent of our body is water. No living being can exist for long without water, the most valuable liquid. We use oceans, seas, rivers and lakes as waterways to carry goods, passengers, etc. Lack of rain causes droughts. Thus, water is very important to our life and our planet.** **63. Topic:** | **64. Controlling idea:** | **65. Topic sentence:** | **66. Concluding sentence:**	۱۷
