۱۴	ت- بخش متن خوانی متن زیر را بخوانید و به سوالات آن طور که خواسته شده پاسخ دهید. The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year. Nowadays, solar energy can be converted into other forms of energy, such as heat and electricity. Solar energy might be used for heating water and air in homes, buildings, or swimming pools. Maybe you've seen buildings or houses with big shiny panels on the roof. These are solar collectors that collect heat by absorbing sunlight and producing solar power. Also, solar energy can be used in generating electricity to provide power for watches, highway signs, houses and even space stations.	٤

The word "convert" in the second paragraph is closest in meaning to ----------. ۴۹. Why do Iranians use special designs and arrangements of windows, balconies and yards in building the houses? ۵۰. How does a solar panel work?	
۵	متن زیر را بخوانید و به سوالات آن طور که خواسته شده پاسخ دهید. It is said that most people have more than ۳۰ friends at any given time, and ۴۰۰ over the whole of their lives. However, on social networking sites, most users have about ۱۵۰ friends. If these numbers are correct, then friendship means different things in different situations. One of the reasons people have more online friends than real friends at any particular point in time is that online friendships do not require much time and energy: it is easy to make Internet friends and keep them forever. Another possibility is that it is difficult to say "no" when somebody asks us to be their friend online, even if we feel we don't really know <u>them</u>. The fact that they ask us suggests that they consider us a friend, which is a nice feeling. Alternatively, they may be "collectors" of online friends and simply want to use us to get a higher number of friends and appear to be popular. Online friendships are quiet easy, but in the real world things are much more difficult. There are no rules about friendship. There are no guidelines about how to make friends, how to keep friendships going, and how to finish friendships if we want to move on. People also have very different opinions about friendship: some people would die for their friends and value <u>them</u> more than family. Others feel that friends are <u>temporary</u>, only there to help each other until they are no longer needed. If people with such different views become friends, this can lead to problems.	۱۵
