Looking up words you don't know can be time-consuming, especially if you don't know which definition to choose when you open the dictionary. Understanding when to look up a word, how an English dictionary is organized, and which definition to choose will help you effectively use the dictionary to improve your understanding of academic texts.

First, decide when to use the dictionary: Before looking up a word, see if you can guess the meaning based on context. Read the whole sentence, and continue to read the whole paragraph to see if you can guess the meaning of the word based on the information that surrounds it.

Second, decide which type of dictionary to use: Online dictionaries have the advantage of being free, portable, and easily **accessible**. However, there are several different types of dictionaries available.

Third, understand how a dictionary is organized: Online dictionaries allow you to type the word into a search bar to find an entry. Within each entry, you will see the word, **its** part of speech, its pronunciation, and one or more definitions.

Last, determine which definition is the correct definition: If a word has several definitions, first identify which part of speech is appropriate for the word based on the context. Then look for word combinations that may appear in your text.

Answer the following questions according to the above passage:

67.What can be time-consuming in using a dictionary?

68. In paragraph no.4 , the underlined word **its** refer to ……

69.In paragraph 3 the best synonym for the word **accessible** can be ……

a. available b. appropriate

True or False

70. If a word has different meanings, it is better to use the first meaning.

a. true b. false
