You should know which dictionary is good to use. A good dictionary can help you with meaning, spelling and grammar effectively.

Choose the right dictionary. You should buy technical dictionaries for your study or job. Some examples are those for math, chemistry, biology and language. It is also a good idea to upgrade your dictionary anytime you can so that you will have the newest words that are added to the dictionary each year.

Read the introduction. The best way to learn how to use your particular dictionary effectively is to read its introduction section, where you'll figure out how the entries are arranged. The introduction section of your dictionary will explain important information such as the abbreviations and pronunciation symbols and the entries.

Learn the abbreviations. Dictionaries have abbreviations in the definitions for a word. This can be confusing if you don't know what the abbreviations stand for. A dictionary will usually have a list of abbreviations near the beginning of the book; either in the introduction, or after it. For example "adj" stands for "adjective".

Learn the guide to pronunciation. If you jump into reading a dictionary without understanding the pronunciation guide, it can be difficult to figure it out. But when you know about the symbols of pronunciation, it will be a lot easier for you. The pronunciation of a word
