13	**متن زیر را بخوانید و به سوالات داده شده ، پاسخ دهید.** You can use a dictionary to look up the meaning of any words that you don't understand. A dictionary is one of the most important tools during your time studying at a university. A right dictionary can help you understand your subject better, improve your communication and improve your grades by making sure you are using words correctly. However, not all dictionaries are the same and if you don't know how to use a dictionary correctly, it could actually teach you the wrong meaning of a word and make it more difficult to get a good grade. Look at the four different types of dictionary below: **Bilingual dictionary** A bilingual dictionary is a dictionary that has the word you are looking for translated into your own language. It usually only has a small amount of information about the word you are looking for but it is easy to understand because it is written in your native language. **Monolingual dictionary** A monolingual dictionary is written only in English. A monolingual dictionary has lots of different information about every word in English. These dictionaries have lots of information about grammar and pronunciation. **Learner's dictionary** A learner's dictionary is similar to a monolingual dictionary because it is only in English and has lots of information about the word you are trying to find. However, a learner's dictionary is a little bit easier to use than a standard monolingual dictionary and has clear examples and simplified language. **A subject-specific dictionary** A subject-specific dictionary is similar to a monolingual dictionary but it does not contain the general meaning of words, only the definitions that are suitable for the specific subject. ❖ **True / False** **42**: A bilingual dictionary has more information than monolingual dictionary. **(True – False)** **43**: A subject-specific dictionary is similar to a monolingual one in containing the general meaning of words**.(True – False)** **44**: A bilingual dictionary shows the meaning of words in your own language. **(True – False)** **45**: Using a learner's dictionary is a little bit easier than a monolingual one. **(True – False)** ❖ **Answer the following questions.** **46**: How can a good dictionary help you? **47**: what will happen if you don't know how to use a dictionary correctly?	4

Respect is a way of acting well or thinking highly about something or someone. You respect those who are important to you. You show your respect by being polite and kind. When you are impolite or act badly toward people, they may feel sad or angry. But whom should you respect the most?

You must care for those who always care for you. You know that your parents care for you for every little thing. You must love them, respect them, and care for them. Besides bringing you into the world, your parents spend their time, energy, and strength to make sure that you have what you need or want. Telling them that you thank them reflects the level of your respect for them.

The easiest way to show your love and respect is to tell them that you appreciate who they are and what they do. You can also do something small but meaningful, for example, wash the dishes, clean the kitchen after dinner or clean the rooms. Your parents will pay attention to and appreciate your acts of kindness. You may also tell your mom how well she cooks, or tell your dad how great he is at his job. For most of parents, any of these small things can be a sign of respect.
