۱۳ متن زیر را بخوانید و به سوالات آن پاسخ دهید.

Many centuries ago, people needed a way to understand words from other languages. At first, they arranged simple lists of words and their meanings. These early lists were the introduction to what we now call dictionaries. Later, in the 17th and 18th centuries, scholars repeatedly collected words and explained them more carefully. Samuel Johnson, for example, published a famous dictionary in 1755. His work contained definitions, examples, and even notes about pronunciation.

In the 19th century, Noah Webster published an American dictionary. His book showed that English could have different forms in different countries. At the same time, other scholars began to write down examples of words that you could find in a diary or a notebook. These collections were compiled in the Oxford English Dictionary. It was not finished quickly; instead, it was developed calmly and patiently over many years.

Today, dictionaries are not only printed books. They are also apps and online tools. A modern online dictionary is more than a list of words. Students can jump into it easily and find collocations, synonyms, and even sound recordings. It is a guide that helps learners forgive their mistakes, learn repeatedly, and respect the language they study.
