3	متن زیر را بخوانید و به سوالات پاسخ دهید. A dictionary is a book which explains the meanings of words. The words are arranged in alphabetical order so that **they** can be found quickly. There are several types of dictionaries: dictionaries which explain words and how they are used, dictionaries which translate words from one language to another, dictionaries of biography which tell about famous people, technical dictionaries which explain the meanings of technical words or words connected to a particular subject. Some of these come close to being an encyclopedia, but an encyclopedia gives a lot of extra information about things (knowledge) and does not explain the use of the language. An encyclopedic dictionary gives less information about the topic than a real encyclopedia does, but more than a simple dictionary. A big dictionary will also give more information about the word. It will explain how it is pronounced. Usually, the International Phonetic Alphabet is used for this. It will explain how the word is used. It will also explain the origin of the word. **33)** If you want to find more information about a topic, you should use an encyclopedia instead of a dictionary **a)** True **b)** False **34)** All dictionaries translate words from one language to another language. **a)** True **b)**False **35)** The pronoun they in line 2 refers to the .... **a)** humans **b)** dictionaries **c)** words **d)** information **36)** Dictionaries of ..... tell us about famous people. **b)** biography **c)** phonetic **d)** alphabetic **a)** technical **37)** Name two different types of dictionaries. This section explains issues like how entries are arranged, what information is offered in entries and what abbreviations and pronunciation symbols are used throughout the entries. **The introduction section of the dictionaries does not explain .....** **a.** word arrangement **b.** word information **c.** symbol pronunciation **d.** entries abbreviation	K
