	A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin' dictio' ('say,in'). There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words.  **52. Why can we find words in a dictionary easily?** **53. What is the difference between technical dictionaries and biographical ones?**	
15	متن زیر رابخوانید و به سوالات داده شده هر قسمت پاسخ دهید	2
	It is very important for us to respect our elders. It is also important to note that elders were not born elders; they were kids like us and now have grown old. A few years hence we will also grow older. If today we respect them, our present and future generations will carry those values and will learn to respect us as well when we grow old. Elders have a lot to share with us: their life experiences, their failures, their successes and many more. Thus, we need to care for them because they deserve to be cared for.  **54. How does our generation learn to respect us when we grow old?** **55. What do elders have to share with us?**

Respect is not only for people; you also need to respect nature. You should learn to respect nature and also teach it to your next generation. There are some good ways to improve the sense of respect for nature among society . When you are outside with your children, take the time to show them the beauty of nature. Show them the blueness of the sky on a clear, bright day, or grey sky on a cloudy day. Ask your child to touch trees, rocks and leaves to feel the temperatures. You can also teach your kids the names of different plants, trees, and animals and practice identifying them. You can do these and show the beauty of nature in your yard or in your favorite park. You may buy a plant for each child that they can take care of inside or outside of the house. You should remind your children that all living creatures are parts of our world and are valuable in the natural environment.

True/False (1 point)

56. According to the passage, people should only respect other people. a) True b) False

57. Our next generations need to know about nature and its value a) True b) False

Answer the following questions. (2 points)

58. Where can you show your children the beauty of nature?

59. What should you remind to the kids?

For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary. When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words **they** are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out .

True / False (1 point)

60. A dictionary is the basic thing for any language class. **a) True b) False**

61. Students must have fewer than three dictionaries to learn English. **a) True b) false**
