Read the passage and then answer the questions.

What is a thesaurus? A thesaurus is a reference work that lists the synonyms and sometimes antonyms of words. Synonyms are words with similar meanings, and antonyms are words with opposite meanings. The word 'thesaurus' comes from Greek, and it means 'treasure,' so we can think of a thesaurus as a treasury of words that can help us better understand the meanings of those words and use them more effectively and efficiently in our writing. Dr. Peter Mark Roget, a British doctor and mathematician, created the first thesaurus. He started collecting synonyms in about 1805 and pretty soon had a nice, little index of them that he used for his own writing projects. In the 1840s, he thought that his list might be of some benefit to others, so he quit his job as a doctor and started to work full time on expanding his collection and getting it ready for publication. The first thesaurus hit the market in 1852 and has remained in print ever since . 4
